Sanjana Kumari

B. Tech (Computer Science and Engineering)| Indian Institute of Information Technology, Guwahati
+91-87971 23442| sanjanawork48@gmail.com | | | | Codolio

Education

•Indian Institute of Information Technology, Guwahati *2024 – Present*
B.Tech, Computer Science and Engineering; CGPA: 7.52/10.0 India

Experience

•SheFi *Jul 2026 – Present*
SheFi Scholar (Season 17) Remote

– Actively learning in an intensive 4-week cohort to explore and develop skills in **Web3, Crypto, DeFi, and AI** alongside a global community of builders and founders

Achievements & Certifications

- **Secured 3rd Rank in Dynamic Programming Completion Test** and earned a **50% Scholarship** in AlgoUniversity's DP Theory Programming Camp, covering Dynamic Programming, Matrix Exponentiation, and Sqrt Decomposition
- **Solved 400+ DSA problems** across LeetCode, Codeforces, HackerRank, and other coding platforms.
- **AWS Cloud Computing Workshop – Mastering AWS Container Services**, conducted by Techniche, IIT Guwahati

Projects

•Uber Clone — Full Stack Ride Booking Application *2026*
MongoDB, Express.js, React, Node.js, Socket.IO, Tailwind CSS

– Engineered a scalable full-stack MERN platform featuring independent, concurrent portals for users and captains, securing complex authentication workflows and strict role-based access control utilizing **JWT** and **Google OAuth**
– Architected an event-driven infrastructure leveraging **Socket.IO** to facilitate sub-second bidirectional communication, enabling instant live ride request broadcasting, dynamic captain matching, and highly responsive real-time in-app messaging
– Integrated mapping capabilities utilizing **Geoapify** and **OSRM** to calculate dynamic routes achieving **95% ETA accuracy**, leveraging **React Leaflet** for interactive mapping across **20+ city zones**
– Leveraged advanced **MongoDB 2dsphere indexing** for highly efficient geospatial queries executing in under **50 milliseconds**, enabling seamless live GPS tracking of **50+ nearby captains** concurrently

•Zivro — AI-Assisted Home Service Marketplace *2026*
React 18, Tailwind CSS, Vite, Framer Motion, Recharts, Axios, PWA

– Engineered a highly responsive **Progressive Web App (PWA)** architecture spanning **15+ service categories** utilizing **React 18**, **Vite**, and **Tailwind CSS**, featuring robust offline **Service Workers**
– Built dynamic UI components handling **3 distinct urgency-based price tiers** and precise GPS location picking, seamlessly integrating **Framer Motion** to deliver fluid **60 FPS** page transitions
– Integrated **20+ comprehensive RESTful APIs** using **Axios** to facilitate secure **JWT** authentication, handle AI-powered image analysis for job duration estimates, and manage dynamic multi-stage booking workflows
– Developed a role-protected administrative dashboard equipped with **5+ interactive Recharts visualizations**, empowering administrators to efficiently monitor critical service metrics and oversee worker verifications

•Lumina Search — Pinterest-Inspired Visual Discovery Platform *2026*
React, Vite, Redux Toolkit, Tailwind CSS, Axios, REST APIs

– Engineered a responsive visual discovery platform utilizing **React.js** and **Vite**, implementing an optimized infinite-scrolling **Masonry Grid** to seamlessly render and lazy-load **100+ variable-sized media cards**
– Integrated and unified **3 distinct third-party REST APIs** (**Unsplash**, **Pexels**, and **Giphy**) via **Axios** to power a robust search engine and automatically generate dynamic recommendation feeds
– Leveraged **Redux Toolkit** alongside **Local Storage** to architect a persistent global state management system, enabling users to seamlessly categorize and curate up to **50+ custom media boards**
– Developed isolated, deep-linkable media detail pages specifically designed for **4 core user interactions** (sharing, downloading, liking, saving), implementing seamless client-side navigation using **React Router DOM**

Technical Skills

- **Programming Languages**: Java, Python, C, JavaScript, SQL
- **Libraries & Frameworks**: React.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Framer Motion, Mongoose, React Router, Socket.IO, Axios, Pandas, NumPy, Matplotlib
- **Databases**: MySQL, MongoDB
- **Tools & Technologies**: Git, GitHub, VS Code, IntelliJ IDEA, Vite, Postman, REST APIs, Jupyter Notebook, PyCharm, Vercel, Render, AWS

Key Courses Taken

- **CSE & Maths**: Data Structures and Algorithms, Computer Organization & Architecture, Operating Systems, Database Management Systems, Artificial Intelligence, Discrete Mathematics, Probability

Positions of Responsibility

- **Event Management Team Member, Yuvaan 2025** (*Feb 2025 – Mar 2025*): Worked with a 12-member team to plan and execute multiple events. Handled coordination and on-ground management to ensure smooth execution.
- **Public Relations Team Member, I&E Cell – Inizio 2025** (*Jan 2025 – Dec 2025*): Managed outreach and promotion for Inizio 2025. Coordinated with a 10-member team, contributing to the first edition's success.
